

BOT CHAIN NATIVE

FlowSub

Subscriptions that run automatically.

A programmable recurring-payment platform for subscriptions and membership services.

The Problem

02

The current workflow creates friction for users, teams, and communities.

- **Challenge 1**

Recurring crypto payments are still difficult to manage for many products and communities.

- **Challenge 2**

Merchants need a simple way to create plans and track active subscribers.

- **Challenge 3**

Users need visibility and control over their subscription authorizations.

- **Challenge 4**

Manual payment reminders create friction for both merchants and subscribers.

The Solution

03

A programmable recurring-payment platform for subscriptions and membership services.

Create

Create subscription plans with price and billing interval.

Connect

Let users authorize and manage subscriptions from their wallets.

Automate

Track active subscriptions, payment history, and upcoming billing.

Verify

Give merchants and subscribers clear dashboards and cancellation controls.

Core Features

04

A focused MVP designed around the product's core workflow.

Subscription plans

Designed for a simple, transparent on-chain user experience.

Wallet authorization

Designed for a simple, transparent on-chain user experience.

Recurring payment flow

Designed for a simple, transparent on-chain user experience.

Subscriber dashboard

Designed for a simple, transparent on-chain user experience.

Merchant dashboard

Designed for a simple, transparent on-chain user experience.

Cancellation & history

Designed for a simple, transparent on-chain user experience.

Who It Is For

Designed for practical adoption across the BOT Chain ecosystem.

SaaS & Web3 Apps

FlowSub gives saas & web3 apps a simpler way to use its core on-chain workflow.

Creators & Communities

FlowSub gives creators & communities a simpler way to use its core on-chain workflow.

Membership Products

FlowSub gives membership products a simpler way to use its core on-chain workflow.

Digital Services

FlowSub gives digital services a simpler way to use its core on-chain workflow.

Why BOT Chain

06

BOT Chain's EVM-compatible infrastructure supports fast, low-cost on-chain applications.

- **Benefit 1**

Low-cost transactions support repeated subscription payments.

- **Benefit 2**

EVM compatibility enables familiar token and wallet integrations.

- **Benefit 3**

Transparent payment history makes subscription activity auditable.

- **Benefit 4**

FlowSub adds programmable recurring payments to the ecosystem.

Current Status & Roadmap

07

Focused on shipping, validating, and refining the product on BOT Chain Testnet.

01

MVP

Core plan creation, subscription, and management flow.

02

Testnet

Validate subscription contracts and payments on BOT Chain Testnet.

03

Refine

Improve authorization, transaction handling, dashboards, and UX.

04

Adoption

Onboard projects and services that need recurring payments.

What We Want From BOT Chain

08

Co-marketing and ecosystem support can help accelerate early adoption.

- 1 Feature FlowSub across BOT Chain social media channels.
- 2 Include FlowSub on the BOT Chain website and ecosystem/project directory.
- 3 Connect FlowSub with projects, businesses, creators, and communities that need recurring payments.
- 4 Amplify FlowSub product launches, updates, and major milestones.
- 5 Collaborate on campaigns and activations that drive recurring-payment adoption.

FlowSub

Subscriptions that run automatically.
